SKILLS

- Languages:** C++, C, Java, Python, JavaScript
Frameworks: HTML and CSS, Flask, Spring Boot
Tools/Platforms: MySQL, Figma, VMware, Oracle, Jira, Overleaf, AWS, Docker, Kubernetes, Selenium IDE, Eclipse, Azure, Git, Jenkins, GitHub Actions, Prometheus, Grafana, Terraform, Antigravity, VS Code
Soft Skills: Problem-Solving, Team Player, Leader, Adaptability

PROJECTS

- Restaurant Expense & Budget Tracker** | *Java, Spring Boot, Postman* | [GitHub](#) Apr' 26
- Built a secure REST API using Java, Spring Boot, and Spring Data JPA with JWT authentication.
 - Implemented RBAC for expense approval workflow and budget management with their own authorized services
 - Integrated the profit calculations and revenue tracking with alerts
- Blue-Green Deployment Model** | *Docker, Kubernetes, Terraform (AWS), GitHub Actions, Grafana* | [GitHub](#) Apr' 26
- Eliminated the risk and reduced the downtime from X hours/month to almost 0 during releases.
 - Automated the release and rollback processes, cutting the deployment by X% and enabling rollback in <30 seconds.
 - Delivered maximum uptime for production almost 3x faster, impacting more than 90% active users.
- Warehouse Inventory Management System** | *Java* | [GitHub](#) Jul' 25
- Designed and implemented a command-driven Warehouse Management System in Java using OOP concepts.
 - Developed a modular warehouse management system using Java fundamentals.
 - Structured the codebase with a scalable, modular architecture and extensible integration to support seamless future integration with a React-based frontend and a Spring Boot backend.
- Sentiment Analysis Chatbot for Stock Trading** | *Python Flask, HTML, CSS, VADER* | [GitHub](#) Apr' 25
- Created a sentiment analysis chatbot using Python Flask, integrating real-time financial news data and Reddit feedback to assess stock sentiment for trading decisions.
 - Constructed a web app with HTML interface and a Python backend to fetch news and analyse stock sentiment securely.
 - Enhanced FinTech automation by applying sentiment insights for risk management and real-time social media monitoring, advancing algorithmic trading capabilities.

TRAINING

- Summer Training | Lovely Professional University** | [Certificate](#) | [GitHub](#) Jun' 25 – Jul' 25
- Python Dynamics: From Algorithms to AI*
- Strengthened Python programming skills by implementing object-oriented programming (OOP), file handling, exception handling, and modular programming concepts in real-world projects.
 - Worked on AI/ML pipelines with data preprocessing, model training and evaluation using NumPy and Pandas
 - Advanced a Python Bill Generator using OOP concepts through a modular and class-based architecture

CERTIFICATES

- Social Networking | NPTEL | [Social Networks](#) Oct' 25
- Build Generative AI Apps and Solutions with No-Code Tools | Infosys Springboard | [GenAI](#) Aug' 25
- Computational Theory: Language Principle & Finite Automata Theory | Infosys Springboard | [automata](#) Aug' 25
- Java Programming | NeoColab | [Java](#) May 25
- Data Structures and Algorithm | NeoColab | [DSA](#) Mar' 24
- Unrevealing basic Python towards ML/AI | CSE Pathshala | [CSEpathshala](#) Mar' 24

Achievements

- Filed a patent, 'Smart In-Bench Phone Storage & Monitoring System' May 24

Extra-Curricular

- Participated in "Republic of Cyber Sentinels Capture the Flag" | [capturetheflag](#) Mar' 24

EDUCATION

- Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.62 Aug' 2023 - Present
- St. Xavier's School** Bokaro, Jharkhand
Intermediate; Percentage: 92.4% Apr' 2021 – Mar' 2022
- St. Xavier's School** Bokaro, Jharkhand
Matriculation; Percentage: 94.1% Apr' 2019 – Mar' 2020
