Projects

Restaurant Expense & Budget Tracker | Java, Spring Boot

Apr' 2026

- Developed a secure **RESTful API** using Java, Spring Boot, Spring Data JPA, and JWT authentication, supporting 100+ concurrent users and securing all protected endpoints through token-based access control.
- Implemented **Role-Based Access Control (RBAC)** for expense approval and budget management workflows, reducing unauthorised access risks.
- Automated profit calculations, revenue tracking, and budget alerts, enabling real-time financial visibility and reducing manual reporting effort by 80% while improving budget compliance.

Repository Link - <https://github.com/riyasingh2119/Budget-Tracker-Springboot-.git>

Blue-Green Deployment Model | Docker, Kubernetes, Terraform (AWS), GitHub Actions, Grafana

Apr' 2026

- Eliminated the risk and reduced the downtime from X hours/month to almost 0 during releases.
- Automated the release and rollback processes, **cutting the deployment by X%** and enabling rollback in <30 seconds.
- Delivered maximum uptime for **production almost 3x faster**, impacting more than 90% active users.

Repository Link - https://github.com/riyasingh2119/Blue-Green_Deployment.git

Sentiment Analysis Chatbot for Stock Trading | Python Flask, HTML, CSS, VADER

Apr' 2025

- Created a sentiment analysis chatbot using **Python Flask**, integrating real-time financial news data and **Reddit feedback** to assess stock sentiment for trading decisions.
- Constructed a web app with HTML interface and a Python backend to fetch news and analyse stock sentiment securely.
- Enhanced **FinTech automation** by applying sentiment insights for risk management and real-time social media monitoring, advancing algorithmic trading capabilities.

Training

Python Dynamics: From Algorithms to AI | Lovely Professional University

Jun' 25 – Jul' 25

- Strengthened Python programming skills by implementing **object-oriented programming (OOP)**, file handling, exception handling, and modular programming concepts in real-world projects.
- Worked on **AI/ML pipelines** with data preprocessing, model training and evaluation using NumPy and Pandas
- Advanced a **Python Bill Generator** using OOP concepts through a modular and class-based architecture

Repository Link - <https://github.com/riyasingh2119/bill-generator.git>

Certifications

- Social Networking **NPTEL - Certificate Link** **Oct' 25**
- Build Generative AI Apps and Solutions with No-Code Tools **Infosys Springboard - Certificate Link** **Aug' 25**
- Java Programming | NeoColab **NeoColab - Certificate Link** **May 25**
- Data Structures and Algorithm | NeoColab **NeoColab - Certificate Link** **Mar' 24**
- Unrevealing basic Python towards ML/AI | CSE Pathshala **CSE Pathshala - Certificate Link** **Mar' 24**

Technical Skills

Languages:	Python, Java, Javascript
Backend:	Springboot, Flask, Node.js, REST APIs, Microservices, Streaming APIs,
Frontend:	React.js, HTML, CSS3
Databases:	PostgreSQL, MySQL
DevOps & tools:	Docker, Kubernetes, GitHub Actions (CI/CD), Git, Jenkins, Prometheus, Grafana, Linux, Jira, AWS, Azure, Terraform
CS Fundamentals:	Data Structures & Algorithms, OOPS, System Design, SDLC, Agile

Education

Lovely Professional University

2023 – 2027

Bachelor of Technology -- Computer Science and Engineering – 8.82

Phagwara, Punjab

St. Xavier's School

2021 – 2022

12th with science – Percentage: 92.4

Bokaro, Jharkhand

St. Xavier's School

2019– 2020

10th with science — Percentage: 94.1

Bokaro, Jharkhand
